Subject index

Adulteration, detection 78, 89, 123
Aflatoxins, detection 83
Ajoene 155
Alcoholic beverages, indices of quality 91
Allicin 155
Alliin 155
Alliinase activity in garlic and onions 155
Allixin 155
Amadori rearrangement products 20, 26, 150
α-Amylase, determination of activity 130
Amylopectin 2
Amylose 2
Aroma
  characterization by biosensors 119
  development on heating 150
Aromatic hydroxylation in irradiated foods 8
Ascorbic acid
  antioxidative effect 30
  influence on iron absorption 59
Aseptic packaging 107
Atherosclerosis 67
Avrami equation 4

Bacon, fatty acid composition 51
Bacteriocins *see* nisin
Beef
  dark cutting 30
  leanness classification 129
Beer, biotechnology applications 50
Benzoic acid as a food preservative 141
Beverage manufacture, biotechnology applications 50
Biosensors 97, 119
Biotechnology
  in beverage manufacture 50
  in the flavour industry 126
Brewing 50

Canola *see* rapeseed
Caramelization 150
Carbohydrates
  chemistry 26
  dehydration of cyclic forms 21
  glass transitions 65
Casein, immunoassay 30
Caseinophosphopeptides 41
Casomorphins 41
Casoxins 41
Cheddar cheese, ripening of 38
Cheese ripeness, evaluation 37
Cholesterol oxidation products 69
Coffee, health effects 53
Colloids 125
Colour, development on heating 150
Computers
  control of food processing 73
  in magnetic resonance imaging 135
Copper, bioavailability 93
Critical control points 104

Dairy products
  indices of quality 91
  micronutrients in 26
  see also cheese, milk
Dark cutting beef 30
Differential scanning calorimetry, study of glass transitions by 62
Disease-resistant plants, toxicity 23
Disulphide bonds, effects on protein dynamics 147

Eggs, indices of quality 91
Electron paramagnetic resonance spectroscopy, measurement of protein dynamics 148
Electron spin resonance spectroscopy, detection of irradiated foods 7
Emulsifiers 160
Energy intake and metabolism 92
Enzyme-linked immunosorbent assays (ELISA) 85
Ethanol vapour generators 113
Extrusion cooking 50

Fats, determinants of consumption 71
Fatty acids in bacon 51
Fatty acids, omega-6 125
Fermentation
  food preservation by 140
  health effects 28
Fish
  fatty acid composition 51
  quality determination 89, 119
Fish oil 125
Flavour
  biotechnology applications 126
  detection of adulteration 78, 123
  extraction 97
  of cured meats 52
  of fats 71
  retention and release 66
Flow-injection analysis 120
Food analysis
  by fluorescence spectroscopy 95
  by gas chromatography 94
  by near-infrared reflectance spectroscopy 44
  immunoassays 30, 76
Food consumption database 131
Food contamination 34
Food inspection 104
Food regulations 128
Food selection 71
Food structure 158
Formulae, infant, micronutrients in 27
Fourier transform 134
Frying, effect on toxicity of fats 67

Garlic, health effects 155
Gas chromatography, food analysis by 94
Gastrointestinal microflora 28, 143
Gellan, intermolecular association 29
Gels
  globular proteins 77
  heat-induced 15
  pressure-induced 15
  starch 2
Glass transitions 4, 62
β-Glucan 29
Glycosylation, non-enzymatic *see* Maillard reaction
Gums, effect on glycaemic index 29

Hazard analysis and critical control points (HACCP) 99, 104, 117
High-pressure technology 14
Howard Mould Count 76
Hydrogen peroxide sterilization of packaging materials 108
Hydroperoxides, lipid *see* lipid hydroperoxides
Hydroxylation, aromatic, in irradiated foods 8
Hypertension and nutrition 74

Ice-nucleation proteins 80
Immunoassays 30, 76, 84
Indices of food decomposition 89
Infrared spectroscopy 44
Instrumental analysis 133
Iron
  bioavailability 56
  food fortification 56
Irradiated foods
  detection 7
  safety 49, 159
Isotope ratio analysis 123

Kamaboko gels 131
Kefir 140

Lactic acid bacteria, heterofermentative 141
β-Lactoglobulin
  effect of γ-irradiation 96
  hydrolysis by thermolysin 16
Lactones as indices of cheese ripeness 39
Lactoperoxidase antibacterial system 141
Lactorphins 41
Lactose intolerance, benefit of fermented foods 143
Larmor relationship 134
Lipid hydroperoxides
  detection 123
  in irradiated foods 8
  toxicity 67
Lipolysis, cheese ripening 38
Liquids, chemical classification 63
Lobry de Bruyn – Alberda van Ekenstein transformation 20

Magnetic resonance imaging, applications in food research 134
Maillard reaction
  control 150
  in aging, diabetes and nutrition 26
  mechanism 20
Mass spectrometry 133
Maté, health effects 53
Mathematical modelling 77
Meat
  indices of quality 90
  species identification 30, 131
Melanoidins 150
Methyl ketones as indices of cheese ripeness 39
Microbiological analysis 128
Microencapsulation 96
Microflora, gastrointestinal 28, 143
Microscopy 34, 100
  study of foods 158
Microwave cooking, Maillard reaction 153
Microwave packaging 109
Microwave sterilization of microbiological media 163
Milk, fermentation 28, 140
Milk proteins, digestion and metabolism 41
Modified atmosphere packaging 111
Most-probable-number counting 129
Mycotoxins, detection 83
Myosin dynamics 147

Near-infrared reflectance analysis 44
Nisin 142
Non-enzymatic browning *see* Maillard reaction
Nuclear magnetic resonance (NMR)
  detection of irradiated foods 7
  determination of protein hydration and

water activity 77
measurement of protein dynamics 148
principles of use 134
Nutrition and hypertension 74
Nutritional status 29
Nutritional value, effect of fermentation 143

Ohmic heating 29
Oils, oxidation 67
Omega-6 fatty acids 125
Opioid peptides from food proteins 33, 41
Optical anisotropy, measurement of protein dynamics 148
Oxidation products, *see* lipid hydroperoxides
Oxygen absorbents 113

Packaging
aseptic 107
hydrogen peroxide sterilization 108
microwave 109
modified atmosphere 111
Peas, quality indices 96
Peptides, bioactivity 33, 41
Peroxidation products *see* lipid hydroperoxides
Pesticides 23, 122, 162
pH, effect on Maillard reaction 153
Phage typing 80
Phytoalexins, formation in plants 24
Polysaccharides, chemistry 26
Potatoes 75
Preservatives 140
Pressure *see* high-pressure technology
Probe molecules 95, 96, 148
Proteins
molecular dynamics 145
pressure-induced gelation 14
secondary structure determination 123
stabilization free energies 146
thermal gelation 14, 77
Psoralens in celery 24
Pyrylium ions, role in Maillard reaction 21

Radioimmunoassays 85
Rapeseed
detoxification 130
new varieties 31
Relaxation
mechanisms in low-moisture foods 62
of nuclear spins 136
Restriction fragment length polymorphisms 24
Risk communication 99

Safety evaluation 79, 92, 99, 104, 122
Salmonella spp., detection 80
Salt, effect on blood pressure 74
Scanning electron microscopy 100
Sensory evaluation 51, 71, 89
Solanine in potato 24
Solvent, effect on protein dynamics 147
Sorbic acid as a food preservative 141
Sous-vide processing 116
Spin–lattice relaxation time 136
Spin–spin relaxation time 136
Starch
determination 29
retrogradation 2, 78
speciality ingredients 162
waxy maize 2
Statistical analysis in microbiology 128
Strecker degradation 150
Sulphur dioxide, control of Maillard reaction 153
Surimi
from British fish species 131
use of cryoprotective agents 51
Sweeteners 75
Syneresis of cheese curd 138

Tautomeric equilibria of carbohydrates 20, 26
Tea, health effects 53
Tempeh 140
Temperature quotient, effect on browning rate 150
Texture, study 101
Thermoluminescence, detection of irradiated foods 7
Thiophenones and meat aroma 152
Toxicity
of disease-resistant plants 23
of lipid peroxidation products 67
Transient electric birefringence, measurement of protein dynamics 148
Transmission electron microscopy 100
Trichothecenes, detection 83
Trithiolanes and meat aroma 152

Vegetables, quality and preservation 127
Vegetable oils, compositional changes during frying 67
Vitamin C *see* ascorbic acid
Vitamin E determination 130
Vitamins
analysis 17, 49
bioavailability 18
extraction procedures 17

Water activity
comparison with NMR data 77
determination 29
effect on Maillard reaction 152
low-moisture foods 62
Water sorption isotherms 52
Wine, biotechnology applications 50

X-ray diffraction analysis of starch 2
X-ray microanalysis 34, 102

Yoghurt 140

Zinc status, effect on iron fortification 60
